Acknowledgements

This book would not have been possible without the time and support from the following people.

I highly appreciate the kind and generous support from the Institut für Sicherheitspolitik (ISPK)—especially from Prof. Dr. Joachim Krause and Dr. Stefan Hansen—for the publication of this manuscript.

I owe a huge debt to Prof. Dr. Christian Martin, who not only guided me through this phase—in person, by phone, video chat, you name it—and always showed openness, care and enormous patience, but also listened to and supported all my projects. I thank Prof. Dr. Wilhelm Knelangen and colleagues of the CPIG research group at the CAU for their helpful comments.

I also thank Dr. Marcel Dirsus, Dr. Sebastian Bruns and Victor Luna for their support, but most important, for their friendship. A special thanks is owed to Claudia Härterich, who provided endless motivation, unlimited patience, and never hesitated neither to comment nor to discuss my drafts.
