ACKNOWLEDGEMENT

I extend my gratitude to all those who helped me to complete my doctoral work. Above all, I thank my good Lord for providing me with the strength to finalise this study.

I am deeply indebted to Prof. Dr. Peter Behrens for the expert guidance and the constant encouragement he gave me throughout my work. I thank him for the patience with which he reviewed my thesis and the time he allotted to me, which was truly admirable. I learnt a lot from the academic discussions we had. I am really privileged to have Prof. Dr. Dr. h.c. Marian Paschke as my second supervisor and thank him for all his support.

This work has largely benefited from the suggestions and inputs made by my uncle George Emmanuel, my friend and economist, Abishek Choutagunta, and my colleagues in the legal field, Dr. Tim Schaper, Dr. Dennis Cukurow, Ms. Shreya Mishra and Mr. Shaurya Aron.

In a special way, I thank my then fiancé and now wife, Gabriella, for being a true pillar of support during my most dispirited moments and for reviewing the draft of my thesis.

I am very grateful to my family and friends for their indirect contribution to this work. I specially thank my parents, Cyriac and Jaculine, for the love and blessings they have been showering on me, and my dear niblings, Tanya, Lynn, Naethan and Johann, for the daily dose of happiness.

I thank the Europa-Kolleg Hamburg administration, Mr. Martin Lieberich and Ms. Sabina Von Kempski for providing me with an excellent research environment. I also extend my thanks to Dr. Ülkü Sezgi Sözen for being always willing to accommodate my doubts and to the Albrecht Mendelssohn Bartholdy Graduate School of Law, University of Hamburg, for their financial support.

INTRODUCTION 17

Background 17
The Objective of the Study 20
Outline of the Dissertation 23
Methodology 24

CHAPTER I. THE CONCEPT OF BIG DATA 26

Part 1 – Definition of Big Data 26

1.1 Volume 27
1.2 Variety 29
1.3 Velocity 30
1.4 Value 31

Part 2 – Competitive Significance of Big Data 33

CHAPTER II. TRANSACTIONAL RELEVANCE OF BIG DATA 40

Part 1 – The Process behind the Collection and Application of Data 40

1.1 Consumer Data 40
1.1.1 Collection of Data 41
1.1.1.1 Cookies 43
1.1.1.2 Other Tracking Mechanisms 46
1.1.2 Application on Consumer Data 48
1.1.3 Building of efficient algorithms 53
1.1.3.1 Advancement in Algorithmic Functions 54
